

THIS IS NOT A PLOT. TO BE USED FOR INSTRUCTION ONLY

Key

- DMX/Data line
- Power Cable
- Fixture

General Notes

1. Fixtures and dimmer packs hang on stand.
2. Dimmer packs plug into the wall electrical outlet via extension cable.
3. Some dimmers need (2) separate electrical circuits.
4. Fixtures plug into dimmer.
5. Lighting controller plugs into dimmer via DMX cable, then connects to the next dimmer pack via a separate DMX cable.
6. DMX always runs female end towards the dimmer and male end towards the controller.
7. Dimmers must be told where they start via an "address" (starting number.) Please see separate dimmer manual for instructions.
8. Faders on controller will control corresponding dimmer if addressed correctly.
